```
              1 2 3 4 5 6   (Rounds)                        1 2 3 4 5 6   (Rounds)

3 to 1    . . . . . .                        4 to 2    . . . . . .

5 to 2    . . . . . .                        4 to 1    . . . . . .

5 to 3    1 3 5 2 4 6   (Queens)             5 to 2    1 4 2 5 3 6   (Tittums)

5 to 1    . . . . . .                        5 to 4    . . . . . .

5 lead    . . . . . .                        5 to 1    . . . . . .

3 to 5    5 3 1 2 4 6   (Whittingtons)       5 lead    . . . . . .

3 lead    . . . . . .                        3 to 4    . . . . . .

1 to 3    . . . . . .                        3 to 1    . . . . . .

1 lead    1 3 5 2 4 6   (Queens)             3 to 5    . . . . . .

2 to 3    . . . . . .                        2 to 1    5 3 1 2 4 6   (Whittingtons)

2 to 1    . . . . . .                        1 to 5    . . . . . .

4 to 3    1 2 3 4 5 6   (Rounds)             1 lead    . . . . . .

                                             3 to 1    1 3 5 2 4 6   (Queens)

                                             2 to 3    . . . . . .

                                             4 to 2    . . . . . .

                                             2 to 1    1 2 3 4 5 6   (Rounds)
```

**Some more to try...**

Get from Rounds to Hagdyke (341256) in 4 calls .. and back to Rounds in another 4 calls

Get from Rounds to 543216 (Back rounds on the front 5) in 10 calls .. and back to Rounds in another 10 calls

Get from Tittums to Queens in 6 calls ... and back to Tittums in another 6 calls

How many different changes can you get on 3 bells (Look in your book !) ?   Can you find a set of 6 call changes, starting and ending in Rounds, to ring all of them?  There are actually two ways of doing this.

Try 8 bells    ...   Get from Rounds to Queens (13572468) in 6 calls ... and back

          ...   Get from Rounds to Tittums (15263748) in 6 calls ... and back

          ...   Get from Rounds to Whittingtons (12753468) in 6 calls ... and on to Kings (75312468) in another 6 calls
